---

Hello all friends !

I would like to inform all that I do a new version DXCC\_XML\_LIST v 1.0.7  
with this change :

DXCC\_XML\_LIST.EXE version 1.0.7 at 13.07.2015 year

- Due to it that the website CLUBLOG have now been redesigned using  
HTML5 technology in the browser I was change program to cooperate  
with those pages . Previous Browser.exe was used directly Internet Explorer.  
The current version Internet Explorer v 11.0 does not include HTML5,  
therefore I designed a new Browser\_chrome.exe which is based on technology  
by Google Chrome, but does not depend directly from Chrome,  
because all the components ie. dll - is present in the directory where is  
present program DXCC\_XML\_LIST.EXE

You can download this program from

[http:// sp9auv.com/EN/index.html?downloading\\_program\\_dxcc\\_xml\\_list\\_e xe.php](http://sp9auv.com/EN/index.html?downloading_program_dxcc_xml_list_exe.php)

Best regards Vy 73 de Jerzy SP9AUV
