Hello all !
I would like to inform users of the program HAM_SECRETARY and AWARD SECRETARY
that developed a new version of the program:
HAM_SECRETARY version 3.4.3 at 04.04.2016 year
- The new version mainly includes changes that allow preparation file for starting in a
AWARD_SECRETARY program . These files are designed for radio amateurs
   who have already been approved awards , and further supplement for award (endorsemen }
they may entrust to AWARD_SECRETARY program. Such data in the files can be any format
   (txt, csv } , and usually contain a lot of unnecessary data.

   To make this files used as a file of starting for the award you generally need in a program
HAM_SECRETARY perform the following steps:
        - Input data from the the fixed-width column
        - Removal of unnecessary lines descriptive.
        - Remove unnecessary columns
        - Introducing his own description of the significance of columns
        - Replacement of some of the words (eg (miasto}   to the miasto   } , or m. to M
         -change single character to another character such as (to a blank sign.
        - Conversion of Polish marks on their ASCII equivalents .that of the international
application program HAM_SECRETARY and AWARD_SECRETARY.
         - Must provide the ability to input data for which the separator of data fields is not only a
comma,
          but any any character as a separator data such as   ;   . | \   /   etc
        - Join two columns to the one column
        - Edit any field in the table, including the header and description fields table

To do this, the software includes a new option translation and sort files with the new
field type .TXTconstant Columns , CSV , pseduo CSV . This is very useful data type.

The new version v 3.4.3 includes the following changes:
    - The ability to replace only one character in the column
    - Added possibility to join column with the one column to the right side .
    - QSO_DATEmay also be in the form of e.g.   21/8/2016 or 21\08\2016. Sign / or \ will be
replaced as standard to characte - about what information is
      present on the screen .
   - Now for the type of field .TXTconstant Columns, CSV, pseduo CSV is the possibility to search
for a row in the table by entering the station callsign
   - Now for the type of field .TXTconstant Columns, CSV,pseduo CSV is possibility to load data
in the form of CSV (comma separated value) or any other character as
     separator , when data is no as column. You just need to choose:
        -delete choice fixed width field
        -select the type of automatic or custom (customer) and as a field separation specify
comma, ie,
     Now you can edit any field before the actual translation.
