Full version history for HAM\_SECRETARY I describe on this page  
[http://sp9auv.com/EN/index.html?downloading\\_program.php](http://sp9auv.com/EN/index.html?downloading_program.php)

Bellow I descibed two last version  
HAM\_SECRETARY version 3.3.4 at 16.03.2015 year  
In this release was do the following changes:

- Due to the overall changes in the server HAM\_QTH.COM I do completely new module . dll for the service and retrieve data from this server.
- Some components in the program were replaced with new components more safer.
- Since it was found that some users are not able to properly create a shortcut on our desktop - despite the the message that created the shortcut incorrectly - by writing me an e-mail.

Now the message has been has been improved and includes a link after clicking on it, the user is directed to a website describing how to properly create a shortcut that is on the page.

[http:// sp9auv.com/EN/index.html?create\\_shortcut\\_to\\_theprogram\\_on\\_your\\_desktop.php](http://sp9auv.com/EN/index.html?create_shortcut_to_theprogram_on_your_desktop.php)  
More "simple rule of thumb" It could not be.

- In a .chm help system was also added chapter  
[Create\\_shortcut\\_to\\_theprogram\\_on\\_your\\_desktop.php](#)
