Hello all friends !

I would like to inform all that appear a new version program AWARD\_SECRETARY for doing application for any award. As a reminder :

AWARD\_SECRETARY for do application, endorsement for many awards including cost optimization for ARRL awards --> one interface for any awards ( conditions for query SQL is in a .dll for every award)  
Do special queries as; Give me unsolicited QSL managers , and many others

Look this picture

[http://sp9auv.com/Pliki/Application\\_DXCC\\_MIXED\\_strona1\\_en.jpg](http://sp9auv.com/Pliki/Application_DXCC_MIXED_strona1_en.jpg)

AWARD\_SECRETARY.EXE version 1.1.5.0 at 20.08.2015 year

- In this version was do the following changes and improvements
- because many logger inserts in the field QSL\_Via all data what give QRZ.COM or others . AWARD\_SECRETARY was equipped into my routine what do correct field QSL\_Via . also if use of the "transmission" this data via website CLUBLOG.
- Was made many correcting in the installation program install\_upgrade\_AWARD.exe, because I think users have met with a problems in the process installation. Now the installation program detects if the installation is performed from a network drive, which really do not like Windows and any firewalls. Program tells you to copy the installation files to the disk physically connected to your computer.
- Expanded file help for the Installation section , which describes how to configure firewalls various kinds ,as firewall Commodo and others .
- The installation screen itself recalls the need of read the help from button or link , Of course, if you do not know what to do - simply press the F1 key help ---> mechanisms context help.

- Fixed a bug in the previous installer program ,if installed in the Windows 7 32 bit, reported the error ' Failed to set Key2"

Files for install AWARD\_SECRETARY and database MYSQL database can be downloaded from my website

[http://sp9auv.com/EN/index.html?download\\_project\\_award\\_secretary\\_and\\_version\\_history.php](http://sp9auv.com/EN/index.html?download_project_award_secretary_and_version_history.php)

Please users wat have any problems , using my discussion forum on

<http://sp9auv.com/fudforum/>

Best regards de Jerzy SP9AUV

AWARD\_SECRETARY.EXE version 1.1.8.0 at 08.10.2015 year

- In this version I do the following changes and improvements :

- for installing a database more easily I was developed a special program for automated installation database  
MYSQL .MYSQL\_INSTALL\_AUTOMATIC\_ALL\_COMPONENT\_AND\_CONFIGURE\_IT.exe ,  
so that the installation is very simple and does not require any data from keyboard or familiarization with the Help. The program  
installs a database and immediately configures it for the needs for AWARD\_SECRETARY without the need for asking anybody  
from the user . These parameters for install and configuration parameters are collected in the initial file  
setup.ini. The program can also serve for professionals purpose to provide users easy tool for install database MySQL  
( " also by Mrs. Sophie from the accounting departments " } Professionals person will find there

also the source of this program in Delphi. You need only must respectively edit the setup.ini .  
But ham- radio should

not, however, absolutely edit this file . Description of the installation is included here

- In connection with the automatic installation of MySQL, the program AWARD\_SECRETARY also been enhanced , so that it no longer  
needs to use the program for administration database. Function backup and restore database or award is do directly in the  
program AWARD\_SECRETARY in a simple way Description here
- In the AWARD\_SECRETARY resign from giving by the user USERNAME and password for the user in a MYSQL database , because it was only the  
reason for mistakes made by users and then errors in a program. These data are set permanently during configuration Installation of

MYSQL database.

- Improved checking the presence of a connection to the Internet.
- Improved method for checking the appears of a new version of the new version program AWARD\_SECRETARY and in the library dll for DXCC List
- Now in line header AWARD\_SECRETARY program and instal\_upgrade\_award.exe and MYSQL\_INSTALL\_AUTOMATIC\_ALL\_COMPONENT\_AND\_CONFIGURE\_IT.exe appears small text about version such as V .1.0.8

AWARD\_SECRETARY.EXE version 2.0.0 at 28.11.2015 year

- In this version I do the following changes and improvements :

- Now every field in the imported file. adi is verified using a special programming technology RegEx Regular Expression based on the so-called. pattern for field , . This technology is new for Windows programming technology and provides a high possibility of finding errors .

This errors are found : Faults ordinary and so-called critical errors which may cause stop working the program or give erroneous results. In the event of critical errors further work program is stoped. Correction error you must do in the logger and again

produce .adi file . Some errors can be corrected as is possible will be corrected automatically

- Due to this technology for check fields screens look a little different , especially if you choose cooperation with CLUBLOG. For now

help chm does not yet include a description of these new screens.

- To perform functions related to the RegEx Regular Expression is designed dll module - pcrelib.dll placed in the installation directory.

As a result of its operation may appear a single screen when you start AWARD\_SECRETARY with message that was changed so-called

date type long and short described in this section. At this point, it is also described how to change the type after installation

• Reducing height of screens in bookmarks , so that now each display is located on a 15 inch monitor (that is 768 pixels vertically)

• Improved the installation program instal\_upgrade\_AWARD.exe, so that it behaves better when installing

• Improved module IN\_POLSKA.dll, used to produce data for Polish awards based only on the station sign.

- Improved also way to check the logging to up to 4 servers personal information for Polish station.
  - Improved also a reproduction method start state award for people who already have a a award and have a file for this award in any format ..
  - Reduced the number fields that are needed to restore the state startup if you can restore some fields from the main QSOs MYSQL file

-AWARD\_SECRETARY.EXE version 2.0.1.1 at 22.12.2015 year

In this version I do the following changes and improvements

- In this version it is possible to run the program in different national environments. The message about the need to set up the date of the short and long in the Control Panel - Regional Options does not appear, because AWARD\_SECRETARY is designed to work in different national environments. An issue with a different date format used in various countries - due to the use of the program in different countries. CTY.XML file download from CLUBLOG uses the following format of the dates in his file of XML.

```
<adif>23</adif>
  <name>BLENHEIM REEF</name>
  <prefix>1B</prefix>
  <deleted>TRUE</deleted>
  <cqz>39</cqz>
  <cont>AF</cont>
  <long>72.00</long>
  <lat>-7.00</lat>
  <start>1967-05-04T00:00:00+00:00</start>
  <end>1975-06-30T23:59:59+00:00</end>
```

And so there is used format yyyy-MM-dd .For different countries are used completely different standards, eg. for Britain dd/MM/yyyy.

For the USA, it is used standard M/d /yy. Here it is mentioned the so-called standard short date. Besides, there is still the notion of the so-called

standard long date .This was resulted in that the program behaved unexpectedly in different national environments. For not to change the type of date in

the settings of Windows, the program AWARD\_SECRETARY uses its own format for a date that does not conflict with other programs that use Windows based set date.

The program AWARD\_SECRETARY must make many operations on dates of DATE\_QSO , since DXCC country is determined not only by the prefix stations, but also on the basis of the date of the QSO. Also, cooperation with CLUBLOG is made using date. So the program will work properly in different countries

- IN\_POLSKA.dll module is now available for all in a global license

AWARD\_SECRETARY.EXE version 2.0.3 at 25.01.2016 year

- In this version I do the following changes and improvements
- Was produced a new file of help taking into account the amendments. especially for validation ADIF fields with Regular Expression pattern
- Was corrected program Browser\_chrome.exe so that was transfer to him the path and name of the selected file of Adif, which enabled self-closing some windows of the browser, thus preventing the user to select a different file ..

AWARD\_SECRETARY.EXE version 2.1.0 at 03.03.2016 year

- In this version I do the following changes and improvements
- Fixed many patterns of fields for Regular Expression. so now there is less critical and ordinary bugs
- Because in th previous versions of the program may be situations that a session connecting to a remote server has been initiated by the server, and that really

does not like firewalls or routers, causing blocking of packets. In this version uses new components in which the connecting session is initiated by the client program, ie in this case install\_upgrade\_AWARD.exe or AWARD\_SECRETARY.exe or UNIINSTAL.exe  
Vy 73 de Jerzy SP9AUV

- Changed components for use with web sites. Before you start cooperation with a remote server, it is tested whether the transmission is correct, and if it is incorrect, it indicated are the reasons that may arise as a result of misalignment of the firewall or hardware router, resulting in blocking transmission .
  - The program features a procedure if a long string sent is the same with the received, indicating the reason for the wrong firewall settings or router that is blocking packages
  - Replaced those encountered symbols bands occurring in some files, such .adif 40m to 40M, ie for compatible with standard adif

AWARD\_SECRETARY.EXE version 3.0.1 at 06.10.2016 year

In this version, I do the following many changes and improvements, so that this version significantly improves the process of execution of the application and search QSL

1. introduced a mechanism for numbering QSL cards received in the form of small labels glued on the received QSL cards, which greatly accelerates the process of finding and preparing QSL cards for notified applications
2. Made merge of several diplomas or endorsement in a one notification application .
3. program watches which is suitable for 1st filing applications in the merger diplomas and what is suitable to create a supplement endorsement in one application
4. for merged awards or endorsement I developed a new form for printing awards ARRL.
5. Described in detail the method of reporting ON\_LINE applications ARRL including showing how to load a file .adif and where you fill data about your account details for payment . File adif for the cheapest method ON\_LINE produces AWARD\_SECRETARY.
6. field CONFIRM\_CONDITION\_AWARD was added to the table ARRL\_AWARDS\_SUMMARY that can better recognize that awards fulfills the conditions
7. modules .dll was added to the ARRL awards for all bands besides the 2 M.
8. I developed procedure to update the structure of all tables wards , and add a new field NO\_QSL\_CARD, also for awards already calculated
9. in the first bookmark for importing data adi has been removed truly continuous reset windows , what allow import data and use the vertical slider to see what was performed operations. In this window is printed now more information at startup and especially as the prosecution proceeded downloading data from Polish servers.
10. Introduced in AWARD\_SECRETARY and in the installation program recognize whether the program is running in Windows 10 upgraded from version 7 or 8, making it possible to adapt the

program in the new environment.

11. for MYSQL\_INSTALL\_AUTOMATIC\_ALL\_COMPONENT\_AND\_CONFIGURE\_IT.exe in version 1.1.0 Improved interface so that better shows and describes the problems that may arise when installing MYSQL database on Windows 10.

Program and files can be downloaded from websites

[http://sp9auv.com/EN/index.html?download\\_project\\_award\\_secretary\\_and\\_version\\_history.php](http://sp9auv.com/EN/index.html?download_project_award_secretary_and_version_history.php)

On page [http://sp9auv.com/Pliki/Dyplomy\\_ARRL\\_polaczone1.jpg](http://sp9auv.com/Pliki/Dyplomy_ARRL_polaczone1.jpg)

i [http://sp9auv.com/Pliki/Dyplomy\\_ARRL\\_polaczone2.jpg](http://sp9auv.com/Pliki/Dyplomy_ARRL_polaczone2.jpg)

you can see what I got diplomas with use AWARD SECRETARY

while on QRZ page <https://www.qrz.com/db/sp9auv> you can see a short description of my programs and screenshots of diplomas obtained
