Hello All !

From station W2DX I get this e_mail

=====

Hello Jerzy,

I just started using DXCC_XML_LIST and get an error after the ADIF download from ClubLog and the records are parsed. I get a Dialog Box saying I/O Error 104. If the Display QSOs checkbox is checked, this Dialog Box is hidden behind THE ClubLog main form and I can't click on the OK button nor do anything else, otherwise it is in front of the ClubLog form and I can click OK to close it.

I am running this on a Windows laptop with Windows 10, version 1607 Build 14393.321

If I can be of further assistance, let me know.

73,

Dell - W2DX

=====

There are my answer

Hello Dell !

Perhaps you are doing this error because :

Program DXCC_XML_LIST was project to compare two adif file .

Sou - it must know where is first adif file what is export from your logger and second adif file what produced CLUBLOG .

You are perhapaps uploaded your adif file to CLUBLOG by another webbrowser as example

Firefox or Internet Explorer

and next only download adif file from CLUBLOG .

Name first file and directory is unknow for DXCC_XML_LIST .

Sou do as this step:

1. First copy your adif file from Logger to directory DXCC_XML_list\FOR_CLUBLOG
2. Run DXCC_XML_LIST and choose Compare your adif file with file from CLUBLOG
3. Next do as is descibed in a link on my page
[http:// sp9auv.com/EN/index.html?convert_adif_log_from_log_to_correc_t_value_accor_www_clublog_and_xml_file.php](http://sp9auv.com/EN/index.html?convert_adif_log_from_log_to_correc_t_value_accor_www_clublog_and_xml_file.php)

4 . It is very important to first upload adif file from logger to CLUBLOG , ever if you previous

upload it by for example by Firefox and next wait for e-mail and only then download adif file from CLUBLOG .

There are repeated error Input/Output error 104 if first download adif file

Perhaps I do protection in my program to check , if user uploaded adif file before download.
But why day have only 24 hours - :? I do also program AWARD_SECRETARY for do application for any awards

Vy 73 de Jerzy SP9AUV
